## Northern Health Palliative Care Advanced ECHO

### Topic: Fentanyl Patch: Considerations and Prescribing Tools Suzy Stever; Pharmacy Lead for Palliative Care November 26, 2021 from 12pm – 1pm

The Northern Health Palliative Care Consultation Team is providing virtual education and support for front line clinicians, using the Project ECHO Model™. ECHO provides an opportunity for clinicians to participate in case-based learning and education with a group of palliative care experts.

This session will include a 10-15 minute didactic presentation and then the remainder of time will be spent discussing a case presentation allowing for participant questions and discussion. This format allows for connection to other clinicians across the north and also to the Palliative Care Consult Team.

- The time commitment will be **1 hour** – **CME Credits are available**
- Participants will be asked to:
  - participate and present or discuss cases from their practice
  - complete a post session evaluation

*'In order to support the growth of the ECHO movement, Project ECHO® collects participation data for each teleECHO™ program. This data allows Project ECHO to measure, analyze, and report on the movement's reach. It is used in reports, on maps and visualizations, for research, for communications and surveys, for data quality assurance activities, and for decision-making related to new initiatives.'*
