Program Objectives

Upon completion of this module participants will be better able to:

- Describe the latest asthma treatment recommendations from the Global, Initiative for Asthma (GINA) and the Canadian Thoracic Society (CTS);
- Discuss why over-reliance on short-acting beta-agonists (SABA) increases risk of exacerbations and worsening asthma.
- Discuss recent evidence on anti-inflammatory reliever reducing asthma exacerbations.
- Identify strategies to transition patients from SABA as a reliever to anti-inflammatory reliever.

Planning Committee

- Jacques Bouchard, MD, CCFP
- Mark FitzGerald, MB, MCh, BAO, MD, FRCPI, FRCPC, FACCPC, FACP
- Alan Kaplan, MD, CCFP(EM), FCPC
- Rakesh Patel, MB, BS, MRCGP (UK), CCFP
