

Not just a prescription pad:

A multimodal approach to chronic non-cancer pain management

Interested in learning more about best practices in the treatment of chronic non-cancer pain?

WorkSafeBC is hosting accredited events throughout B.C.

The learning objectives of this session are designed to help you:

- Incorporate the College's Standards for the safe prescribing of opioids into clinical practice
- Apply key principles for tapering of opioids and initiating substitution and exit strategies
- List risks and benefits of non-opioid treatment modalities for chronic non-cancer pain and gain confidence in recommending them
- Identify community and regional resources and supports, including WorkSafeBC programs
- Develop confidence in engaging patients in the difficult conversations related to tapering opioids, exiting opioids, and/or refusing to prescribe opioids
- Screen and identify coexisting substance use disorder, mood disorder, and sleep disturbances.
