

EXCITING UPCOMING PHYSICIAN QUALITY IMPROVEMENT OPPORTUNITIES THIS FALL:

WORKSHOP	DESCRIPTION	LENGTH OF WORKSHOP	DATES
QI Tools & Data	This interactive workshop allows you to try out a number of QI tools and learn about how to use data in QI. Come prepared to roll up your sleeves and have some fun.	8 hours (full day)	October 21, 2021
Systems Thinking and Navigation	Understanding the system that we are working in is the first step to any QI project. This workshop supports you to learn new ways to get the information you need about the NH system.	4 hours (1/2 day)	October 22, 2021
Organizing your Project	Practical tools and skills to keep your team organized and make your project a success. Learn about evaluation planning, MUSIQ Scores, GANTT and RACI charts, and how to create a change management plan.	8 hours (full day)	November 17, 2021
Leadership in Quality Improvement	Leadership skills are useful in any task or role, but they are a necessity when leading a QI project. Join us for this engaging session that supports you to learn first about your own personality and then how best to work with others.	8 hours (full day)	TBA
Working with Patient Partners	Health care is all about the patient, so why not ask the patient what would improve the system. This workshop suggests way to include patient partners on your QI project teams.	3 hours (1/2 day)	TBA

If you have any questions about the workshops, please reach out to your local PQI coach or feel free to contact physicianqi@northernhealth.ca

Registration will fill up fast, so make sure to reserve your spot for these events!
