

Principles of Quality Improvement: A Workshop for Physicians

Learn essential tools to improve quality of care

Who is it for?

Northern physicians, Northern Medical Program faculty and Northern medical students

Why attend?

To achieve better care and health outcomes! Healthcare quality is concrete and measurable, much like the vital signs of a patient. The science of quality improvement has been adapted successfully from industry to healthcare over the past two decades and includes many useful tools and methods for improving efficiency, safety, and clinical outcomes.

It's accredited! Participants are eligible for 3.5 Mainpro-M1 and Section 1 credits and reimbursement for your time.

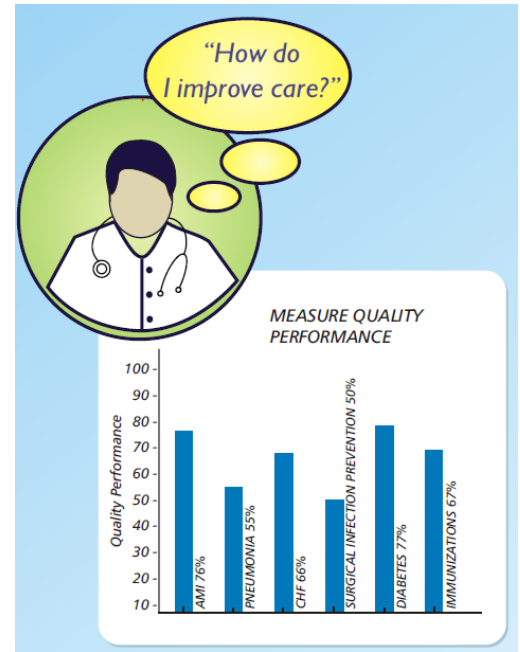

What does the workshop cover?

The workshop is 4 hours and covers:

- Quality Improvement, Quality Assurance & Research: What's the Difference?
- Why Quality Improvement?
- Five Key Foundations of Continuous Quality Improvement
- Quality Improvement Methods & Tools to take to the office, clinic or hospital
- Resources and supports for quality improvement
