

## Shortage Resolution

# UHNBC oxytocin 10 units/mL X 1 mL vial

### **Resolution:**

The oxytocin 10 units/mL x 1 mL single-use vials are in consistent enough supply with current allocations to return to regular wardstock practices at UHNBC.

### **Practice Implications:**

UHNBC pharmacy will stop providing the alternative oxytocin 10 units/mL X 10 mL *multi-dose vials* and return to providing the 1 mL *single-use vials* as per regular wardstock practice.

Thank you to NH staff and physicians for your patience during this shortage.
