

Product Discontinuation and Change: sodium chloride 0.9% nasal MIST

The Issue: Sandoz has discontinued the only available nasal MIST – sodium chloride 0.9% (Salinex®) – for adults and children over the age of 2 years.

Alternative Product: Sandoz continues to supply the sodium chloride 0.9% nasal SPRAY (Salinex®) for adults and children over the age of 2 years.

Staff should be aware that Northern Health will be switching to the SPRAY formulation.

Discontinued Product - Nasal MIST	New Product - Nasal SPRAY
	
<p>Note: These products are the same active ingredient and dosing for adults and children over 2 years, in different formats.</p>
