

Shortage Resolution

Sodium Tetradecyl Sulfate 3% Injectable Tromboject®

Resolution:

The shortage of sodium tetradecyl sulfate 3% injectable (2 mL single-use vials and 5 mL multi-dose vials) has resolved with an adequate ongoing supply.

All existing supply of sodium tetradecyl sulfate 1% injectable (2 mL vials) has expired in NH and a timeline on resupply is undetermined at this time.

Practice Implications:

Clinicians can return to using sodium tetradecyl sulfate 3% injectable for patients as clinically appropriate.

An update will be provided when more information is available regarding future availability of the 1% injectable product.

Thank you to NH staff and physicians for your patience during this shortage.
