

Shortage Resolution

Injectable Magnesium Sulfate

Resolution:

Availability of injectable magnesium sulfate (200 mg/mL X 10 mL vials and 500 mg/mL X 10 mL vials) has improved and NH pharmacy has access to an adequate ongoing supply.

Practice Implications:

Clinicians can return to using injectable magnesium sulfate as per usual practice as clinically appropriate.

Thank you to NH staff and physicians for your patience and assistance with conserving supply during this shortage.
