

February 2022

Dear Surgeon,

Re: 2022 BC Diagnosis (BC Dx) Code Updates and new forms

The Surgical Patient Registry (SPR), in consultation with provincial clinical subject matter experts, has updated several Adult BC Dx codes. These updates will be implemented **April 1, 2022.**

What do you need to do?

1. Please discard previous BC Diagnosis (Dx) code forms (v2021) and replace with the current version: **v2022-P1.**
2. Ensure you use both **Adult** and **Pediatric** BC Dx code forms for your specialty:
ADULT patients = 17 years or older, at date of decision
PEDIATRIC patients = 17 years, less a day, or younger, at date of decision

*It is vital to waitlist management to use the correct code set **based on your patient’s age at date of decision (the date at which the patient is ready, willing and able to proceed with surgery).**

What was updated in 2022?

- **Pediatric Priority1** (wait time target: 1 day) codes have been added to the PDF **Pediatric** code forms for surgeon use. No changes were made to the pediatric codes themselves.
- Adult code updates for v2022-P1 include only:

Neurosurgery	32BZAH Refractory Epilepsy, second stage following intracranial monitoring (P1). New code. <i>32BZAG Refractory Epilepsy requiring intracranial monitoring (P5) will expire.</i>
Ob/Gyne	50RMIE Retained IUD pregnant. New code.
	50RMIF Perforated IUD. New code.
	50RMJB Retained IUD – not pregnant, not perforating. Description clarification adding “not perforating”.
	50OTAA Abdominal foreign body for removal (e.g. IUD) (P5). Expired code.
	50RZAC Infertility (P4). New code to replace 2 codes: <ul style="list-style-type: none"> • <i>50RZAA</i> Infertility > 35 years old (at time of booking) will expire. • <i>50RZAB</i> Infertility < 35 years old (at time of booking) will expire.
	50RMDF Menorrhagia – moderate / severe impact on lifestyle (P4). New code to replace 2 codes: <ul style="list-style-type: none"> • <i>50RMHD</i> Menorrhagia – severe impact on lifestyle will expire. • <i>50RMHE</i> Menorrhagia – moderate impact on lifestyle will expire.
	50RZDG Chronic pelvic/vulvar/vaginal pain (P4) was created with higher priority to replace 50RZDE (P5)
	50RMMA Abnormal uterine bleeding high risk of malignancy (for example Post-menopausal) (P1) description update to include “(for example post-menopausal)”.
	50RMMB Abnormal uterine bleeding low risk of malignancy (for example pre-menopausal) (P4) description update to include “(for example pre-menopausal)”.
	50RMJA Undesired/abnormal pregnancy, termination - not reportable to SPR - description update to include ‘termination’ to clarify only pregnancy termination procedures are to use this code.
50RMLA Retained products of conception/missed/incomplete miscarriage requiring evacuation (P1) - description update to remove the word ‘a bortion’ which may be confusing to non-medical data consumers.	

If you have any questions or feedback on the BC diagnosis codes, please contact the SPR office, at SPRoffice@phsa.ca

Thank you for your continued cooperation and support.

Susan Parkyn
Director, BC Surgical Patient Registry
Provincial Health Services Authority

General Surgery - Adult (17 years and above on the date of decision)

Diagnosis Group	BC Diagnosis Code	Diagnosis Description	BC Priority Level	Wait Time Target In Weeks
Adrenalectomy	30PBAE	Primary aldosteronism or Cushing's syndrome	3	6
	30PBAF	Pheochromocytoma	2	4

Colorectal Surgery	30NMAB	Diverticular stricture of the colon	1	2
	30NMAC	Obstructing Crohn's disease	1	2
	30NMAD	Inflammatory bowel disease without complication of haemorrhage, perforation/sepsis or obstruction	3	6
	30NMCA	Colonic carcinoma	2	4
	30NMCB	Colonic carcinoma - partially obstructing	1	2
	30NMEA	Prophylactic colectomy	4	12
	30NMEB	Diverticular disease of the colon	4	12
	30NPAA	Temporary stoma - reversal of colostomy/ileostomy	4	12
	30NQAC	Procidentia	4	12
	30NQCA	Rectal carcinoma	2	4
	30NQCB	Rectal carcinoma with short course preop radiation	1	2
	30NQCC	Rectal cancer preop chemo-radiotherapy down staging	3	6
Endoscopy - Positive FIT	30NMDD	Positive FIT (fecal immunochemical test) – outside BCCA screening program	3B	8
	30NMDE	Positive FIT (fecal immunochemical test) – BCCA screening program	3B	8
Endoscopy - Screening for Family History	30NMDF	Screening Colonoscopy for personal or significant family history - outside BCCA Screening Program	5	26
	30NMDG	Screening Colonoscopy for personal or significant family history - BCCA Screening Program	5	26
Endoscopy - Surveillance	30OZDG	Short interval surveillance where reassessment required under 1 year: follow-up for previous endoscopic resection of large/complex polyp, repeat due to inadequate bowel prep resulting in incomplete procedure - outside BCCA screening program	3B	8
	30OZDH	Surveillance where assessment period 1 year or over; wait time starts at date surveillance is due - outside BCCA screening program	5	26
	30OZDI	Short interval surveillance where reassessment required under 1 year: follow-up for previous endoscopic resection of large/complex polyp, repeat due to inadequate bowel prep resulting in incomplete procedure – BCCA screening program	3B	8
	30OZDJ	Surveillance where assessment period 1 year or over; wait time starts at date surveillance is due - BCCA screening program	5	26
	30NADA	Chronic Gastroesophageal Reflux Disease; asymptomatic pancreatic/biliary stricture with normal liver chemistry; not suspicious for malignancy; pancreatic cyst, not suspicious for malignancy; chronic unexplained abdominal pain; stable dyspepsia	5	26
Endoscopy - Symptoms and Findings (con't next page)	30OZDA	High likelihood of cancer; severe Dysphagia/Odynophagia; active IBD; obstructive acute jaundice; resection of neoplasm; variceal ligation; EUS-guided drainage of fluid collection/necrosectomy; stenting of malignant stricture/fistula; PEG/PEJ tube	1	2

Diagnosis Group	BC Diagnosis Code	Diagnosis Description	BC Priority Level	Wait Time Target In Weeks
Endoscopy - Symptoms and Findings (con't)	30OZDD	Bright red rectal bleeding; Anemia; confirmation Celiac Disease; stable Dysphagia; obscure GI bleed (capsule endoscopy/enteroscopy); EUS assessment submucosal lesion; stent replacement; duodenal polyp/ampullectomy; treatment of chronic GI bleed (e.g. APC)	3B	8
Endoscopy - * Other Diagnosis Codes (provide detailed diagnosis or condition in free text description)	30OZZA	GI symptoms other P1	1	2
	30OZZB	GI symptoms other P2	2	4
	30OZZC	GI symptoms other P3	3B	8
	30OZZD	GI symptoms other P4	4	12
	30OZZE	GI symptoms other P5	5	26
Hepatobiliary Pancreatic	30OAAA	Liver Transplant - Living Donor	1	2
	30OACA	Hepatocellular carcinoma	2	4
	30OACB	Metastatic liver disease	2	4
	30OACC	Liver benign tumour	3	6
	30ODAB	Biliary colic - severe (daily pain)	1	2
	30ODAC	Biliary colic - intermediate (frequent pain)	3	6
	30ODAD	Biliary colic - chronic (infrequent symptoms)	4	12
	30ODCA	Gall bladder carcinoma	2	4
	30ODCC	Gall bladder polyps	4	12
	30OEAD	Benign bile duct stricture	4	12
	30OECA	Bile duct tumour	2	4
	30OJAB	Chronic pancreatitis	4	12
	30OJCB	Malignant pancreatic tumour or non-functioning endocrine tumour	2	4
30OJCH	Endocrine tumour of pancreas - functioning	1	2	
Hernias	30SYAA	Inguinal or femoral hernia	4	12
	30SYAB	Umbilical hernia	4	12
	30SYAC	Incarcerated hernia (inguinal, umbilical, incisional) without bowel obstruction	2	4
	30SYAD	Incisional/ventral hernia	4	12
Laparoscopy	30OZAA	Diagnosis laparoscopy - benign	3	6
	30OZCA	Staging laparoscopy - suspect malignant	1	2
Morbid Obesity	30OZBC	Morbid obesity once cleared for surgery through pre-conditioning program	4	12
Retroperitoneal Tumour	30OTCA	Retroperitoneal malignancy	2	4
Salivary Gland	30FPCC	Salivary gland benign disease	4	12
	30FPCD	Salivary gland malignancy	2	4
Skin	30MZCB	Lymph node malignancy	2	4
	30YSAA	Pilonidal disease	4	12
