

Shortage Resolution

Heparin 10,000 units/mL X 0.5 mL Vials

Resolution:

Heparin 10,000 units/mL X 0.5 mL vials are now available in good supply and this drug shortage can be considered resolved.

Practice Implications:

NH pharmacy has received additional supply and will be able to access more ongoing. Wardstock areas that had stock removed or reduced can now have usual supply levels reinstated.

Conservation efforts can be removed and clinicians can return to using heparin 10,000 units/mL X 0.5 mL vials as per usual practice.

Thank you to NH staff and physicians for your patience during this shortage.
