

Shortage Resolution

Ondansetron 4 mg Oral Disintegrating Tablets

Resolution:

Ondansetron 4 mg oral disintegrating tablets (ODT) are now available in good supply and this drug shortage can be considered resolved.

Practice Implications:

NH pharmacy has received additional supply and will be able to access more ongoing. Wardstock areas that had stock removed or reduced can now have usual supply levels reinstated.

Conservation efforts can be removed and clinicians can return to using ondansetron 4 mg ODTs as per usual practice.

REMINDER: ondansetron ODTs are **formulary restricted** to patients unable to tolerate other available dosage forms (regular oral tablets, liquid, or injection)

Thank you to NH staff and physicians for your patience during this shortage.
