

Expression of Interest: Access and Flow Medical Director

Northern Health Access and Flow Services

Northern Health would like to invite eligible physicians to indicate their interest in the following physician lead role: Access and Flow Medical Director

This position provides leadership to medical staff to promote physician engagement and involvement in the range of the initiatives under Northern Health Access and Flow Services. Key areas of responsibilities:

- Works in a co-leadership model with the Executive Director, Access, Flow and Transfer to establish Access and Flow standards, processes, and guidelines
- Provides strategic and operational planning for the organization for Access and Flow to optimize and improve system capacity across the continuum of care
- Provides leadership and promotes physician engagement and compliance with the established Access and Flow standards, processes, and guidelines
- Supports escalation processes when required
- Stimulates and leads quality improvement and change management using data, information, evidence informed practice guidelines, standards, policy and research to inform service development
- Manages information, education, and research for Access and Flow
- Participates as a NH representative on regional and provincial working groups
