

## Shortage Resolution

### adenosine 3 mg/mL X 2 mL pre-filled syringes

#### **Resolution:**

The shortage of adenosine pre-filled syringes (PFS) has now resolved and NH pharmacy is able to access sufficient supply.

#### **Practice Implications:**

NH pharmacies can return to regular wardstock practices and NH clinicians can return to using the PFS as needed.

Staff may see both the PFS and adenosine 3 mg/mL X 2 mL *vials* in circulation as we transition crash kits and wardstock areas back to the PFS.

Thank you to NH staff and physicians for your patience during this shortage.
