

Shortage Resolution

alteplase 100 mg vials

Resolution:

The shortage of alteplase 100 mg vials has now resolved and NH pharmacy is able to access supply.

Practice Implications:

NH pharmacies can return to regular wardstock practices and NH clinicians can return to using alteplase 100 mg vials as needed.

The alteplase 50 mg vials that were brought in as an alternate will be used up before switching all sites back to the 100 mg vials. Sites may see both the 50 mg and 100 mg vials in circulation until the 50 mg stock is used up.

Thank you to NH staff and physicians for your patience during this shortage.
