

## Shortage Resolution

### salbutamol 2.5 mg/2.5 mL and 5 mg/2.5 mL nebules

#### **Resolution:**

The shortage of salbutamol nebules has now resolved and NH pharmacy is able to access sufficient supply.

#### **Practice Implications:**

NH pharmacies can return to regular wardstock practices.

Despite sufficient supply as we near the 2025/26 respiratory illness season, clinicians are advised to continue reserving nebules for patients who are unable to use a MDI + spacer (as we cannot rule out future shortages).

Thank you to NH staff and physicians for your patience during this shortage.
