

Northern Health Therapeutic Guidance for Adult Patients with Suspected or Confirmed COVID-19 – **UPDATE: Oct 4, 2021**

The NH Therapeutics Committee has representation on the BC COVID-19 Therapeutics Committee (BCCTC) and in collaboration with this group a provincial guidance infographic has been developed for [Antimicrobial and Immunomodulatory Therapy Recommendations in Adult Patients with COVID-19](#).

This document and [more information regarding therapies for COVID-19](#) compiled by the provincial group, can also be located on the BCCDC Health Professionals COVID-19 care site under Clinical Care, Treatments section.

It is important to note that all *medication supplies are fragile and judicious use of any treatments are strongly advised.*

For more information on COVID-19 treatment recommendations please refer to the Northern Health platform on [Firstline](#).
