Re:	NH RN Transport Response Team Completion

In spring 2020, NH in collaboration with BC Emergency Health Services (BCEHS) developed a temporary 24/7 Transport Response Team staffed with critical care nurses to assist with timely patient transfers during the COVID-19 pandemic. NH Emergency, Trauma, and Transfer Services is announcing the completion of the NH RN Transport Response Team with no further availability of this service beyond today, **November 30th, 2020.**

We would like to extend our sincere appreciation to the dedicated Transport Response Team Nurses that have worked diligently to make this program possible over the past seven months and for their flexibility in being redeployed from their current positions at the University Hospital of Northern BC (UHNBC). We would also like to thank the UHNBC Leadership Team and BCEHS for their partnership in this endeavor.
