

Multi-Disciplinary Rounding

The **MDR** is a tool within PowerChart that allows the provider to have a regularly scheduled meeting of team multidisciplinary team caring for the patient and document the outcomes of the meeting directly in the patient's chart. The MDR and/or Summary report is visible to the Physician, Therapists, SW, Care Team, Dietician, Pharmacist etc.

- ✓ High level overview of patient data for rounding and discharge planning
- ✓ Focuses on patient discharge readiness
- ✓ Documentation provides access to completed notes, rounding summary note, handover
- ✓ Direct access to patient chart
- ✓ Access to **Care Coordination PowerForm** from *Create drop-down*
- ✓ Access to **Form Browser** by clicking *Open Form Browser* hyperlink

Why?

- Improve patient outcomes, reduce mortality rate, reduce LOS, prevent complications, reduce errors, improve pt satisfaction,
- Gathering of real time information and a clear, concise communication pathway
- Eliminates clinicians spending time gathering information and updating as the patient status changes.

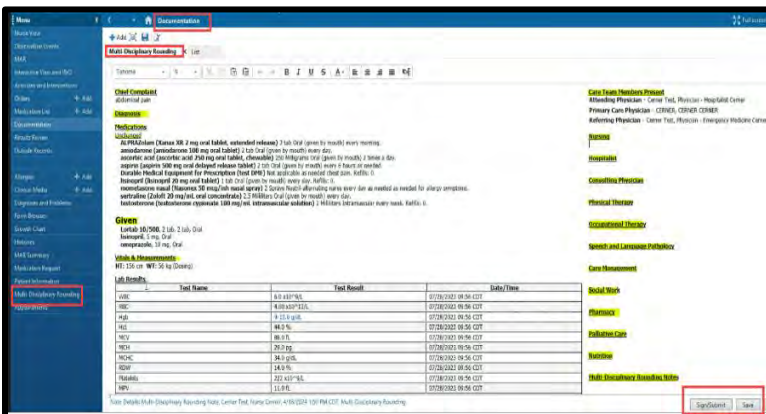

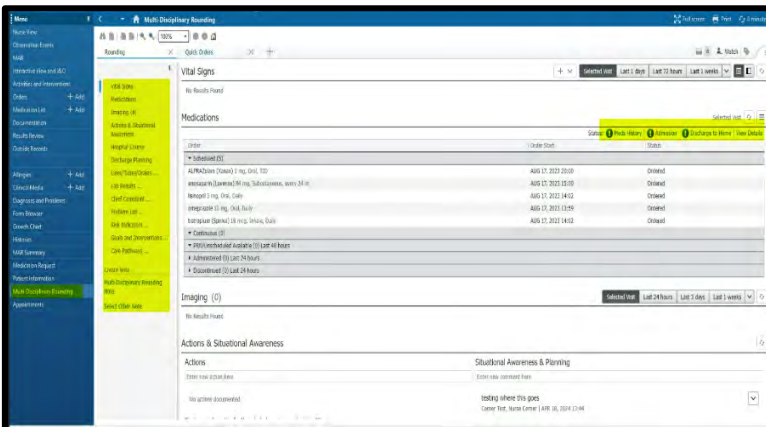

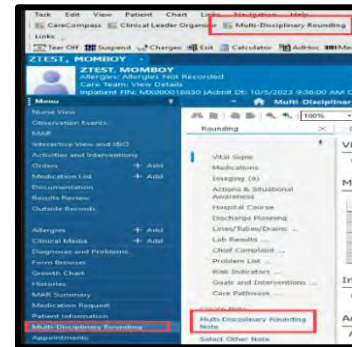

Multi-Disciplinary Rounding

The **Interdisciplinary Rounding Summary** note is used to document discussion outcomes of rounds by the designated scribe/appropriate clinician. Your unit's rounding documentation process may vary dependent on your unit's specific processes.

Purpose of Multi-Disciplinary Rounding

- To exchange information
- To identify care plans and goals
- To identify gaps in pt care and act early
- To determine discharge needs
- To get assistance to access resources for patients
- To generate a to-do list for the care team
- To address challenging social or discharge issues

- Review patient information in the Multi-disciplinary Rounding tab within Clinical Leader Organizer (CLO)
- Easily identifiable in Nurse View List and Rounding List
- Document on Interdisciplinary Rounding Summary Note
- Care Coordination PowerForm
- Mpage pulls clinical documentation related to patient assessment, planning, and risks
- View/Access can be configured to Physician and leadership positions
- Easy to view with minimal navigation
- Multidisciplinary rounding worklist
- Workflow component
- Dynamic doc template and population of a signed MDR Summary Document
- New discern rules.
